This discussion is designed to receive feedback specifically for the third "Resolved" in the Draft Policy: CASC\_W Policy\_2019\_1\_DRAFT\_9.24.19.pdf

"A grade of XF to be added to the grading system which can be assigned at the discretion of faculty for students who are not attending. This grade will have a numerical value of 0 for GPA purposes. Note that faculty retain the right to use "F" instead of "XF" in this instance."

Rationale: This would add an optional "XF" grade to the drop-down menu. This distinction is meant to indicate that the student stopped attending, but did not officially withdraw. During discussions with faculty, the subcommittee found that many faculty were applying a W from the drop down menu at the end of the semester for the "disappearing student." This XF designation is meant to take the place for when the W was previously applied in those situations by faculty. Please note, that the faculty would not be required to use this distinction, and would also retain the right to indicate a F (or other letter grade) on the final grade menu, as he or she deems appropriate based on grading policies and individual course requirements.

This is indeed a good compromise. I share the same that Dennis captured above regarding how we treat the developmental classes I definitely support the XF option. The XU is a great idea for developmental students only and allows us to stay within the developmental grading culture.
